Product Governance and Oversight

At Commercial Express we act as a co-manufacturer for the products we provide, therefore Product Governance is of key importance to us. We operate a robust framework that provides an effective review and oversight process throughout the lifetime of our products, which includes procedures for new product development, assessing the impact of significant change on products, procedures for product withdrawal, and ensuring ongoing fair value reviews take place.

Within this document you will find information on our Product Governance and Oversight arrangements, a description of the **Target Market** for each of our products together with details of who the product would not be suitable for, and information on the expected distribution strategy.

This document is for your use only as a distributor and is not intended for customer use.

Our Product Governance and Oversight Framework

The objective of our Product Governance Framework is to ensure that the products we co-manufacture are consistently delivering good outcomes, providing fair value to the intended **Target Markets**, and that this is maintained throughout the lifetime of the product.

We achieve this by ensuring any new product design or significant changes to existing products consider the objectives, interests, and characteristics of customers, prevents or mitigates customer detriment and ensures any conflicts of interest are mitigated or managed appropriately. All relevant risks to the **Target Market** are considered prior to launching a new product, with appropriate testing and market research being conducted before release. We do not introduce new products to the market if the results of testing indicate that the products do not meet the identified needs, objectives, and characteristics of the **Target Market** and do not provide fair value.

We consider the ongoing review of our products as vital to ensure they continue to provide value. Each review considers the performance of the product, how the product is being converted or retained, whether there have been any changes to the **Target Market**, claims MI, complaint and feedback data, and market research. All of our products are subject to an annual review in accordance with FCA requirements.

From time to time, we may also ask you as a distributor of our products for additional information that will assist in the fair value assessment of our products.

Distribution Arrangements

Our products are suitable for distribution on an advised or non-advised basis via an insurance Intermediary, in accordance with FCA regulations.

As a distributor of our products, you should also ensure the product is of fair value to your customer and that any additional remuneration such as fees or charges you receive in relation to our products does not impact the value provided to the customer.

Target Market and Fair Value Statements

Our **Target Market** and Fair Value Statements provide you with information on the type of customer that the product is suitable and provides value for, and equally the type of customer that the product would not be suitable for. They will provide you with some key information however must be reviewed alongside the accompanying Policy Wording and Summary of Cover / Insurance Product Information Document to ensure all cover limits, features, terms, and conditions of the policy are understood.
